Pathways to a Fusion Power Plant

FOCUS

Law Creates Freedom

26 | Forever and Ever?

Democracy can be abolished through democratic means. The Max Planck Law network is investigating the extent to which the law can protect against this.

32 | Displaced by the Climate

Rising sea levels, heat waves and droughts are forcing many people in the Global South to leave their homes. How can the international community offer them prospects?

38 | Germany's Advantage

As an export-oriented country, Germany has benefited more than most from the opportunities of the EU. But economic changes are needed to ensure future prosperity.

100TH ANNIVERSARY

52 | Pioneering Minds in International Law

The Max Planck Institute for Comparative Public Law and International Law has been providing German diplomacy with legal expertise for 100 years.

KNOWLEDGE FROM

58 | Lisa Listens to Space

The world's largest instrument will soon measure gravitational waves in orbit around Earth, providing new insights into the physics of black holes.

64 | Echoes of Evolution: the Cichlids of Lake Tanganyika

The Great Lakes of Africa are home to many species of fish. By analyzing their behavior, scientists can learn how and why certain behaviors have evolved.

70 | Cars with Internal Values

Autonomous vehicles have the potential to make road travel safer. But their introduction also raises questions about ethics and sustainability.

76 | Green Steel from Red Mud

A toxic by-product of aluminum production can be turned into CO₂-free iron using hydrogen from renewable sources.
